

# Using Share to Classroom

Share to Classroom is an extension Chrome extension that lets teachers create Google Classroom activities without accessing Google Classroom. Using Share to Classroom, teachers can create assignments, ask questions, post announcements, and can even share a website with their students by "pushing" the website to student devices!

## To Use Share to Classroom ...

1. Access a website you wish to share with students
2. Select the share to Classroom icon located on your extension bar
3. Select the section of Classroom with which you wish to share the resource
4. Choose how you want to share the resource. If you choose "push to students, the site you are on will be "pushed" directly to student devices!
